

KRYPTOBONDS - A REVOLUTIONARY INVESTMENT BLOCKCHAIN IN THE CRYPTOCURRENCY WORLD

Premium Bonds arrive for the first time in the Crypto Market offering prizes of up to \$240,000 only by holding KryptoBonds!

History

The Bonds industry in the UK has evolved to give investors the chance of winning big prizes instead of interest on their shares. Nowadays they have a market of 21 Million people investing over 60 Billion Pounds.

Purposes

KryptoBonds aims to facilitate the broad use of Bonds in the Crypto Market by allowing KBS holders to diversify their portfolio and create a fun way to Invest, Save and Win through a raffle system.

KryptoBonds goes one step further implementing these bonds to the Crypto Industry with the advantages of the blockchain technology. Unlike other crypto initiatives, there is no need to purchase any tickets to participate in the draws. Only by owning KBS you will have the chance to win monthly prizes of between \$15,000 and \$240,000, paid in cryptocurrency.

Why invest in KryptoBonds

Investing in KryptoBonds is very straightforward. Every KryptoBond (KBS) you buy provides automatic dividends and has a unique identifier with a separate and equal chance of winning in a monthly prize draw. The more KBS you have, the more chances of winning.

Every Token invested has three ways to yield you returns: Token revaluation, Dividends and Monthly draws.

The ICO is capped at 90.000.000 KBS. The coins will be distributed in the following phases:
